DURABILITY

DAMAGE PROTECTION FROM DAILY OPERATIONS

THE CHALLENGE

Protecting an outdoor, acid filled ground PVC line from damage due to the power plant's daily operations.

We can't use 'other insulation' because the pipe won't be protected.

-Insulation Installer

THE SOLUTION

Dragon Jacket Insulation™ Pipe Insulation System in DJS1™ Black

- Straights (standard 3' sticks)
- 45's
- Buttstrips
- 37" SS Bands

THE RESULTS

A "clean" and easy to install insulation system that maintains all thermal properties while protecting the pipe from the rigorous demands of the power plant's daily activities.
