**Dragon Jacket  
Insulation System  
Winter 2020**

## 360°

### of Insulation Encapsulation

protects the line from damage due to snow and ice build up. Dragon Jacket's insulating core is fully encapsulated with a rigid barrier impermeable to moisture, able to withstand daily operations, including unpredictable and inclement weather conditions, with chemical resistance options available.

**Insulation to be Replaced**

### Modular Design

Dragon Jacket Insulation Systems are modular in design. Custom length Straights and Insulated Pipe Saddles made installation fast and easy, eliminating extra or unnecessary material components that lead to typical insulation system failures.

**Dragon Jacket Solution**

**Insulation to be Replaced**

## Engineered for Expansion & Contraction

Dragon Jacket S2™ was specified for this project due to the chemical and physical properties which accommodate for expansion and contraction caused by varying wind speeds, temperatures and freeze/thaw cycles.
