

DRAGON JACKET INSULATION™

(208) 772-8640 11888 N. TRACEY ROAD HAYDEN, IDAHO 83835 WWW.DRAGONJACKET.COM | INFO@DRAGONJACKET.COM

PROJECT SCOPE

FORCED MAIN SEWER SUSPENSION BRIDGE

Kootenai River - Bonner's Ferry, Idaho

- (2) 6" 800 ft. lines
- Straights
- Bolt Through Insulated Pipe Saddles
- Valve Covers
- Banding Tool
- Bands

THE CHALLENGE

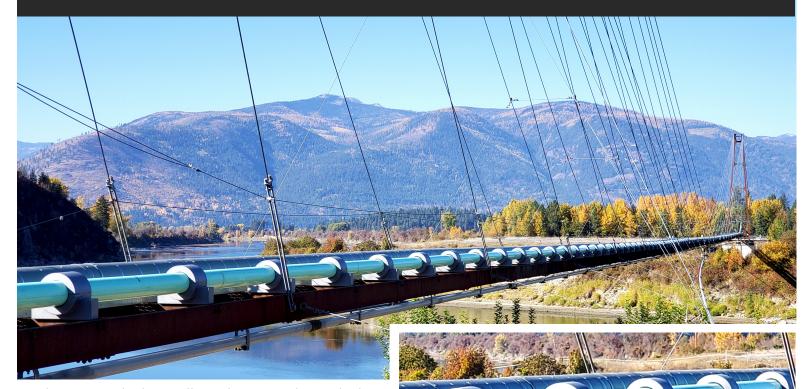

The bridge started with one line that needed to be replaced. A new line needed to be installed and operational before removing the original line. The original line then needed to be installed and insulated without contaminating the river and maintaining a safe work environment for the crew.

The entire job was scheduled to be completed within 6 weeks.

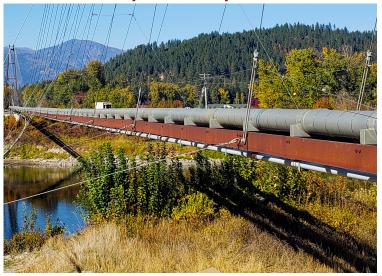

ENGINEERING PRE-JACKETED SOLUTIONS

INNOVATIVE • ENCAPSULATED • INSULATION

Dish soap aided in pulling the pipe through the Pipe Saddles

INSTALL TIME 3 WORKERS | 8 HOURS | 135 SADDLES

The Straights (6 ft. sections) were installed after the pipe was pulled through the Pipe Saddles

INSTALL TIME

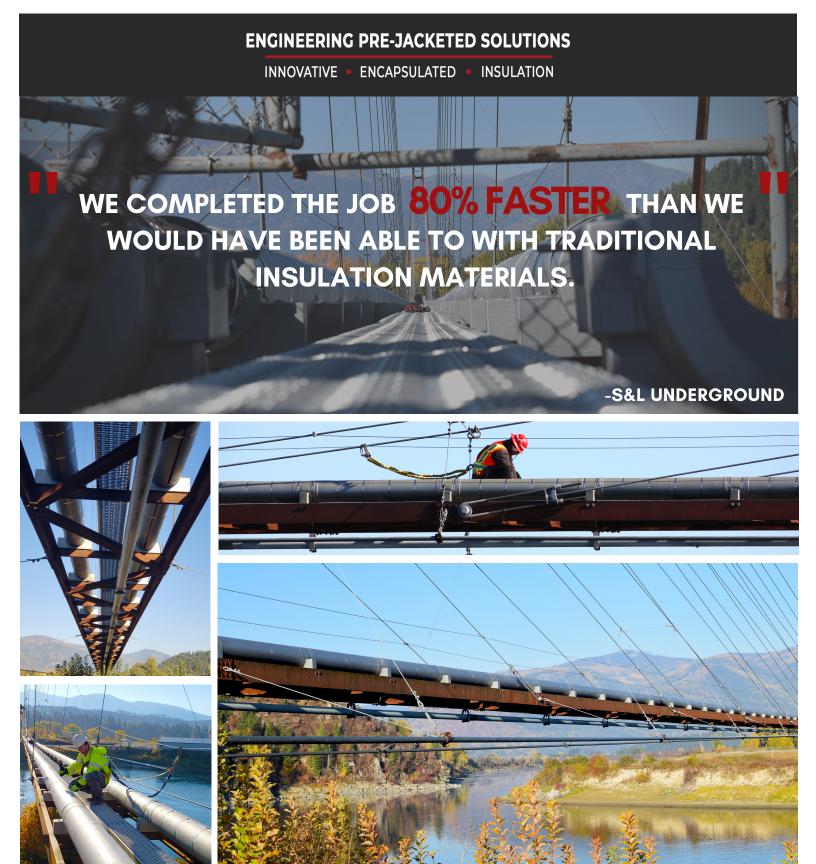

4 INSTALLERS | 4 HOURS | 800 FT. STRAIGHT

"INSTALLING THE STRAIGHTS ON ONE SIDE OF THE BRIDGE WOULD HAVE TAKEN US 5 DAYS USING TRADITIONAL INSULATION. "

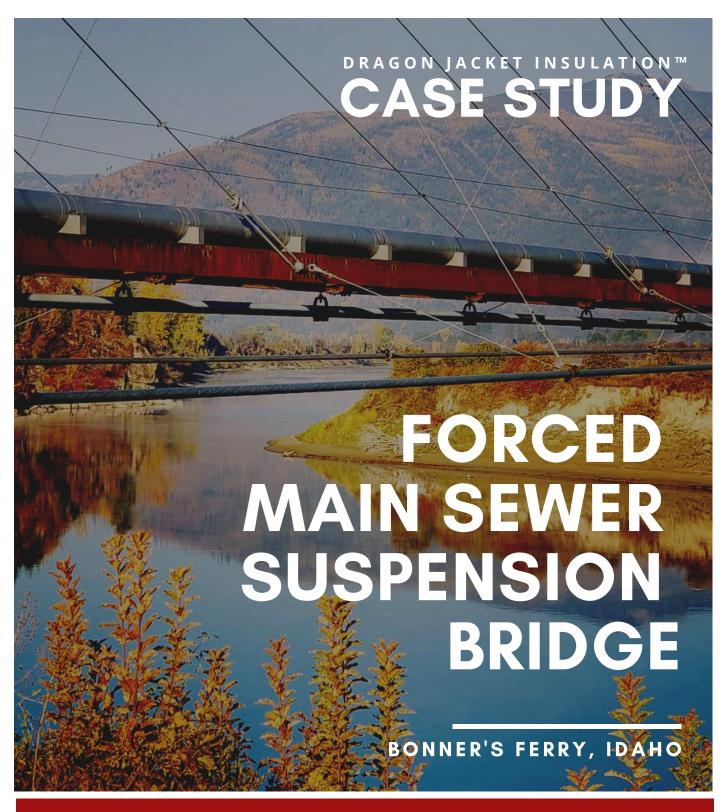

-S&L UNDERGROUND

DRAGON JACKET INSULATION™ SYSTEMS ARE SHIPPED READY TO INSTALL, AND CAN BE INSTALLED ANYTIME.
