

DRAGON JACKET DURABLE, REUSABLE PIPE, VALVE, FITTING & TANK INSULATION

# INSTALLATION AND FIELD MODIFICATION TIPS AND RECOMMENDATIONS

Engineered to Withstand Extreme Weather and Operational Conditions

## Helpful Installation Tips

- Fittings should be installed **first**, with **Drip Edges** facing down.
- On horizontal runs, straight lengths should be installed with the hinged side facing up and the seam opening facing down.
- Band every foot on straights, making sure that there is a band on the Buttstrip end where straights connect to fittings.
- **Remember Orientation Matters!**

## Modifying Straights

- Always cut the opposing end from the Buttstrip.
- Use a sawzall, hand saw, or cutting tool with fine-toothed metal blade to make cuts.
- Caulk the Splice Cover to the cut end of the straight.

## Recommended Supplies

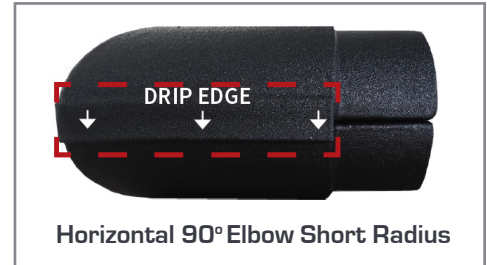

- Cutting Tool (for best results use sawzall, handsaw, or cutting tool with a fine-toothed metal blade).
- Stainless steel bands
- Banding Tool
- Caulking or equivalent
- Dry areas: PL Polyurethane Sealant Loctite Roof and Flashing.
- Wet Areas: 3M Marine Adhesive Sealant 5200
