

100% WATERPROOF
For Food-Grade Spraying & Sanitization

MITIGATES CUI
No Corrosion Under Insulation

THERMAL STABILITY
Energy, Process & Cost Efficiency

FAST & EASY INSTALLATION
Using Standard Tools & Personnel

BUILT-IN PEST CONTROL
100% Encapsulated & Impenetrable

DURABLE & REUSABLE
20+ Year Lifespan

Static R-Value
12.53 Per 2 Inches

Static K-Factor
0.174 BTU-IN/HR-FT²-F

Operating Temperature Range
-60°F to +350°F
(depending on coating options)

DURABLE, REUSABLE DRAGON JACKET PIPE & TANK INSULATION

Engineered to Withstand Extreme Weather and Operational Conditions

Dragon Jacket products are durable, reusable and long-lasting. Impact and weather resistant, with a 20+ year life expectancy, our patented process combines insulation foam and coating for a 100% waterproof encapsulation that will never fail due to moisture absorption.

From Processing and Pasteurization to Canning, Bottling, and Rendering, the Food Industry Relies on Dragon Jacket!

Fiberglass and cladding insulation break down quickly in food production environments. Standard insulation does NOT provide the 100% waterproof and CUI resistance the industry requires. 98% of insulation failures are moisture related. That's why Dragon Jacket pipe and tank insulation products are engineered to keep water out, even if the insulation material is cut and the foam core is exposed.

Dragon Jacket's Static R-value Maintains Thermal Stability for Processes Operating Above & Below Ambient Temperature.

Choose Dragon Jacket Insulation to:

1. Mitigate energy loss, lower energy costs and reduce greenhouse gas emissions.
2. Stabilize process controls against temperature fluctuations, which can contribute to degradation and expensive quality control issues.
3. Minimize safety hazards by reducing team exposure to hot and cold surfaces.

One & Done!

With Dragon Jacket, there is no additional cladding required. Simply secure the insulation with metal bands or zip ties depending on the application and call it a day.

"The food production industry needed a better insulation option with a lower TCO and a smaller environmental footprint than what was on the market. Dragon Jacket meets that need. Highly efficient, low waste, easy to install and maintain - this is the insulation of the future for all industries operating within extreme environments." - Todd Peretti, President/CEO, Dragon Jacket Insulation
